ISA Automation Project Management Specialist Certificate

Steps to Earn the ISA APM Specialist Certificate

- 1 Successfully complete the training course
- 2 Pass a multiple choice exam

You'll receive the APM specialist certificate, and a digital badge which can be shared on social media and with your employer and/or professional network.

This certificate course provides real-world, practical knowledge that you can apply right away. It begins by covering basic project management concepts then pivots to focus specifically on project management for automation projects—addressing the unique and complex challenges of industrial automation and process control.

Through this course, you'll learn how to:

- Identify the nine major phases of a project
- Understand the challenges of automation projects
- Grasp key areas of project management, including: integration, scope and cost management, risk management, and other important topics
- Review design approaches for major tasks and software configuration methodology
